2023 USGS 104g Funding Opportunity Notices

The FY2023 USGS 104g General funding announcements have been posted online.

- National Competitive Grants (General) #G23AS00485:
<https://www.grants.gov/web/grants/view-opportunity.html?oppld=346333>
- Aquatic Invasive Species (AIS) #G23AS00483:
<https://www.grants.gov/web/grants/view-opportunity.html?oppld=346316>
- Per-and Polyfluoroalky Substances (PFAS) #G23AS00484:
<https://www.grants.gov/web/grants/view-opportunity.html?oppld=346326>

Budget templates and supporting materials for 104g proposals are [available to download here](#).

NOTE: All applications must be submitted through the State Water Resources Research Institute.

Applications submitted through the Mississippi Water Resources Research Institute must be completed and submitted to MWRRI by April 3 to allow for internal review and processing to meet the USGS deadline of April 27, 2023.

As in previous years, collaboration with USGS staff is strongly encouraged. Please carefully read the *COLLABORATION BY FEDERAL EMPLOYEES* section and *Attachment 3* (104-g General ONLY). Note that a letter of support is required for **ALL** federal collaborations, regardless of whether or not it is funded. However, as in previous years, **ONLY** the 104g-General proposals enable a funded USGS collaboration.
